## The Tournament Keeper

Effective 1/15/2010

Prices are subject to change without notice. Please check the website for current pricing.

There are four editions of the Tournament Keeper. Why the difference? The Standard version was developed with the small organization or club that maintains its membership and wants to manage a tournament schedule. This system has many features that try to handle the multitude of configurations that exist. Therefore, it is crammed full of \*options, features and is regularly updated.

The "Professional" and "Enterprise" editions are lean and mean and developed for the organization office and field use. They are customized for the specific needs of the organization which usually requires less generalized features, more specialized record keeping or scoring, and custom reporting. The development of a "Professional" or "Enterprise" edition for an organization starts with a detailed needs assessment, one-on-one communication and testing. Once the product is completed and delivered, there is direct contact with the developer on modifications and system tweaking. The system is licensed to you and can be installed on as many computers as you need based on the number of client access licenses purchased. These systems require a signed Software License Agreement and Software Maintenance Agreement.

Features	Standard \$99.95	Pro Scale with Pro Tournament Scale \$169.95	Pro Scale with Pro Tournament Scale and Leader Board \$299.95	Professional BASS & FLW Federations Only \$500 (40% discount)	Professional (Includes Bluewater Edition) approx. \$800	Enterprise (Includes Bluewater Edition) Starts at \$800
